Complete Price List For Fall 1930

BOUNTIFUL RIDGE NURSERIES

PRINCESS ANNE, MARYLAND

These Prices Supersede All Previous Prices on Nursery Stock Which We List to Our Customers

FOR DESCRIPTIONS OF STOCK LISTED ASK OR SEND FOR OUR LATEST CATALOGUE

Every item we deliver has been inspected by the State Horticultural Department of Maryland, it is grown far from the infested area of the Japanese beetle. We are giving you the advantage of our long experience in producing high grade nursery stock and with the personal supervision which we give every department of our nursery we are able to GUARANTEE complete satisfaction to every customer.

Do not confuse this stock with lighter grade stock that is being offered to you by other nurseries at low prices.

If you have never dealt with us give us a trial order this fall and compare the stock with that you have been buying from other sources at much higher prices, then you will know where to place your larger order for spring planting.

AVERAGE COLOR and GRADES

The Picture That Tells the Story Between Profit and Loss

Extra-fancy grade apples are what every fruit grower wants to grow, the more the better and when you plant Blaxtayman you will harvest more Extra fancy grade apples. This is a tried and proven apple, having every merit of the well known Stayman Winesap with many advantages over this favorite. Continued tests have proven that the Blaxtayman colors a beautiful solid red all over without a trace of stripe. It is crisp and juicy and has the same excellent flavor as the Stayman Winesap. The Blaxtayman has a firmer texture and a thicker skin than the regular Stayman and that it will not scald in storage, which enables the Grower to pick it earlier and keep it longer. Some advantages are: Earlier coloring * * a full red color * * more extra fancy apples * * Earlier picking—No windfalls * * No scald in storage, * * Earlier Marketing * * better keeper for late markets * * More Profits. **IT PAYS TO PLANT THE BEST REGARDLESS OF PRICE AND PRICES * * WELL—HERE IT IS * * THE REDUCTION IN PRICES ON THIS BLOOD RED STAYMAN WINESAP APPLE THAT CHALLENGES YOU TO PLANT THAT ORCHARD OF THEM AND RICHARD DELICIOUS.** There is now no reason to hesitate; the prices are right; we have one of the finest lots of the trees we have ever grown; the fall is the ideal time to plant the trees; **SEND YOUR ORDER NOW WITHOUT FURTHER DELAY.**

6% discount allowed on all stock listed where cash accompanies the order.

RICHARED
(TRADE MARK REG.)
DELICIOUS

**AN ECHO FROM THE GREAT
DELICIOUS APPLE SECTION
OF THE NORTHWEST**

**WILL ENTIRELY REPLACE
PLANTING OF COMMON
DELICIOUS**

R. EDWARD TRUMBLE
Consulting Horticulturist

Wenatchee, Washington.

I have seen and observed your new strain of Delicious, the "RICHARED," both on the original parent tree and also the apples on the young trees, and in my opinion you have the most beautiful apple in the world. It is certainly marvelous to see these—full blood red color in August, while Delicious on adjoining trees are still green. This added color with advantages of earlier picking, earlier marketing, firmer apples, more extra fancies, no loss from "Windfalls," and better keeping qualities, convinces me that in the "Richared" Delicious you have an apple worth millions of dollars to the apple industry of the world.

I have seen and tasted your "Richared" Delicious which the records at the cold storage plant showed were kept in cold storage for three (3) seasons—apples picked in 1925 and still firm, crisp and juicy in September, 1927, two years later.

I have no hesitancy in stating that in my opinion the "Richared" Delicious will entirely replace plantings of common Delicious and that it is a better apple from every standpoint.

R. EDWARD TRIMBLE,
Consulting Horticulturist.

All Red ! "August Color" ! Still Green

RICHARED
TRADE MARK REG. U. S. PAT. OFF.
The DELICIOUS Supreme

**A BLAZING EXAMPLE OF ONE OF NATURE'S CONTRIBUTIONS
TO PROGRESS**

**A Blood Red Bud Mutation of the Famous Delicious Apple That Promises to Revolutionize
the Growing of Delicious Apples**

You need no longer marvel in doubt. It is here. That Real Delicious Apple that colors a full bright red, without a stripe on every part of the tree weeks before time to pick the fruit. The apple that every man who grows Delicious apples has dreamed of and hoped for. The significance of this Phenomenal freak of nature is hard to realize. It will mean millions of dollars to the fruit growers of this great country. No orchardists can overlook these facts about this new apple, the **RICHARED DELICIOUS**. A tree of the same hardy characteristics as the old Delicious, producing an apple with that same appetizing, delicious flavor, producing an apple that colors a full bright red without a trace of stripe on every part of the tree, the apple attaining this color weeks before we usually pick the old Delicious, thus enabling every one who grows it to eliminate the usual loss from drop apples, to pick earlier, to market earlier if he desires to do so, to seek a foreign market with a high quality apple that has superior carrying qualities when picked early and to keep longer in storage for our late markets if desired. These advantages combined with the fact that better than 80 per cent of the apples will grade extra fancy grade should make it one of the most profitable apples for the fruit grower. **WE HAVE THOUSANDS OF THE FINEST ONE AND TWO YEAR TREES OF THIS GREAT APPLE GROWN ON THE SUNNY EASTERN SHORE THAT AWAIT YOUR CALL. DO NOT HESITATE, PLANT THEM.**

Prices same as Blaxtayan, see them front page of folder.

Golden Jubilee

Developed and introduced by the New Jersey Experimental Station—A high quality, Early, Yellow, Freestone Peach beyond every expectation.

This is an exact reproduction of the **GOLDEN JUBILEE** Peach in size, color, texture, and general appearance. The peaches from which this reproduction was made were picked from second generation trees at Westville, N. J. July 31, 1929. The merits of this Peach can be readily realized by every fruit grower. The peach stands apparently without a weakness.

The **GOLDEN JUBILEE** peach is a second generation seedling of the Elberta crossed with the Greensboro. The tree is very hardy; the foliage more resistant to disease than the average. The blossoms open after Elberta and are very hardy. The peach is a yellow skin and yellow fleshed peach being highly and attractively colored; it is a perfect free stone. Has a self fertile blossom; is a prolific bearer, ripening from 3 to 5 days before Carman or about 3 weeks before Elberta. It will carry well to market and compare favorably with Elberta on any market regardless of season.

We have some fine trees of these for this fall and next spring, but do not think there will be enough to go around so order now to be sure of getting yours.
